

## Make your own tessellation!

Step 1: Make a square.

Step 2: Draw a simple shape on one side of the square.

Step 3: Trace the simple shape on tracing paper, cut it out, and trace around it on the opposite side of the square.

Step 4: Draw another simple shape on top of the square.

Step 5: Trace that simple shape on tracing paper, cut it out, and then trace around it on the opposite side of the square.

Step 6: On a new piece of paper, trace around the whole shape you've made (called a tesserae), and keep repeating the pattern by placing it next to itself and on top of itself until your page is full.
