

MASTER YOUR TOOLS

Collect problem-solving tools.
Practice until you can use them with confidence.

Classic math tools: pencil and paper,
ruler, protractor, compass.

Modern tools: calculator, spreadsheet,
computer software, online resources.

Physical items: dice, counters,
special math manipulatives.

Tools for organizing data:
graphs, charts, lists, diagrams.

Your most important weapon is your own mind.

Be eager to explore ideas that deepen
your understanding of math concepts.
